A must for any new parent. Especially those who have been shy with babies and children in the past.

By nycMARCseattle

Before I had my twin daughters, I have to admit I was not the type of guy who was naturally drawn to babies/ children and tended to avoid them. When people did make me interact with their children, I would just stare at them with a nervous half smile and say "uuhhh..... whats up?". Needless to say no baby or child were impressed with my presence. This was never an issue till my daughters arrived. I loved them so much and yet was not sure how to interact with them and what they can perceive at their ages. This book was perfect. It's filled with games in order of age (by month) so you know if its appropriate for their child. It's clearly written and has photos which explains the games better. Best of all it mentions how each game is beneficial for your child such as sensory, strength and bonding. I now have a number of games that I play with my daughters, it has made my time with them so much more precious.

Meh

By DCMD14

Hm... Am I missing something? This book doesn't tell you anything you already know from common sense. Dangle things in front of the baby, make noises, hold them and lift them, give them stimulating toys, etc. Returning mine.

Inexperienced Mom's Idea Guide

By Troubleswingman

Okay, I'm a first time mom and only child so I have never had the experience of working with newborns and young infants for an extended period of time. Many reviews said that this book is filled with common sense actions/items, and for those who have siblings or previous experience with newborns, I can see how it would be. For me, on the other hand, it is filled with ideas on how to help my baby develop in ways that I probably would not have imagined. Sure, one or two of the moves you will already know, but many of the other ones you may not have thought of. If you plan on spending lots of time around your baby and are looking for ways to keep him/her entertained (and yourself, let's face it), then this book is for you. What's even better is that with the exception of one or two smaller objects, the vast majority of the book can be conducted without purchasing any toys. It's just you, your baby, and a prop or two you already have around the house.
