For undergraduate courses in the sociology of the family.

Focuses on studying the family through a sociological lens.

Families and Their Social Worlds discusses how the family is viewed on a macro level, by examining policies in place and how those policies impact families. The author encourages students to think about families beyond their own personal experiences, and even beyond family structure in the United States. Her goal is to impart a passion for critical thinking as students see that families exist within social worlds. Important policy considerations are imbedded in each chapter to illustrate what is currently being done, and perhaps even more importantly, what can be done to strengthen families and intimate relationships.
