Again, Loren Coleman has taken the time and effort to compile an inquisitive narrative into his forte; *Cryptozoology* and mysterious places.

You are gently led down his early paths of inquiry that seem to reflect his true Fortean attitude and beliefs that eventually expose the idea that anything is possible.

The reports never seem to die off and although many of them are very old, some are surprisingly recent. From black panthers to strange bipedal hairy humanoids, the trails fork right and left and more times than not, the evidence leads to even more difficult questions.

Old wives tales and legendary folklore have led to permanent impressions and resulted in many locations being given strange and leading names as to their history. Such as the name Devil being used hundreds of times in naming mountain peaks, caves, and lakes. It's true and worldwide, although sometimes other supernatural monikers are also used; such as spirit, ghost, and witch.

What it all comes down to is a great chapter book to be read just before bedtime with milk and cookies.

A great interest prodding script that makes it difficult to put down.

It rates my five stars for sure.
