Trench Doctor's view of health care

By James A. Brennan Jr.

In the midst of our national health care emergency, Dr. Robert Linden has produced a book that tackles the critical issues head-on from the front line vantage point of a personal care physician who has spent the last thirty years working directly with his patients. If you are curious about the drugs you are taking, the health insurance policy your company offers, the explosion of health care premiums, malpractice claims or the dearth of doctors in primary care, this book is a must read. If you are wondering why your congressman and senator seem to flail about hopelessly in a vain search for a system other countries have already successfully implemented, Dr. Linden gives a detailed look at the UK, France, Taiwan, Canada, the Netherlands and what the US can learn from each. He shows what works, what doesn't and how our leaders can reform the present system to meet the health care needs of our citizens. When you are done reading the book, send it on to your congressman. It may be our only hope of enacting successful health care reform!

Real Health Care Policy Answers

By Peter Tavino

Sunrise River Press has produced a gem of a book with *The Rise and Fall of the American Medical Empire*. It is refreshing to have a Primary Care Physician share his forty years of experience and knowledge with such eloquent writing style. The in depth descriptions of today's pharmaceutical and insurance industries taught me much in a short time. There are clear views into the worlds of hospitals, medical schools, malpractice litigation, and government programs, both here and abroad. Were a calamity to strike my family or me, I can now make intelligent protocol decisions. Perhaps our elected officials will study this informative work, and direct our future health care to the more sustainable and practical application of medicine, which Dr. Linden so aptly prescribes.

A MUST READ FOR THOSE ENTERING MEDICINE

By Alan Cohen

Dr.Linden's "Rise and Fall..." is a must read for anyone concerned about the future of medicine and primary care in the United States,in particular for those entering the profession and contemplating a career in Internal

Medicine or Family Practice. As a general Internist, whose started a solo practice in 1976 when a well trained Internist was an Intensivist and consultant to General Surgeons,Ob-Gyns,Orthopods,and G.P.s,I find that Dr. Linden very accurately covers the same issues that I have observed , experienced and read about over the last 34 years ,that have drastically changed the role of the General Internist.This book is extremely well written,accurate, well footnoted and informative and will ring true for any physician who reads it.I will be sending copies to my 2 daughters at Einstein and Dartmouth Med Schools."
