About the Author

The story of GEET is also the story of its besieged inventor, Paul Pantone. He was born in 1950 in Detroit, Michigan, and began inventing as a child. He and his family moved to Southern California in 1959. In his teens, Paul built several inventions, without knowing he was inventing. Paul also built a number of handy tools including a “stud gun” for splitting firewood and a glow in the dark level with 27 different functions. During the energy crisis of the late 1970s, Paul became concerned with the high price of oil, so he set his mind to searching for a solution. By 1979, Paul had managed to discover over 250 ways of NOT getting better mileage or less pollution. He kept searching and experimenting. In 1983, Pantone created his first working GEET engine. In 1984, a local newspaper wrote a story about Paul Pantone and GEET. In 1985, Pantone & GEET were featured on the evening news. Paul continued to refine the technology. Over many years, Pantone made a number of attempts to introduce GEET to nonprofit organizations, only to find out that none of them actually wanted to support solutions like this. In 1994, Paul Pantone moved to Utah. A trust was created to protect the GEET patent. A school was created to teach GEET technology, and a corporation was created to manufacture GEET products. In 1999, Paul gave away the “small engine” part of the GEET technology still available online at teslatech.info.

THE BOOK OF GEET: BOOK ONE: BASIC SCIENCE BY PAUL PANTONE PDF

THE BOOK OF GEET is not just another science book. It delves into many aspects of freeing the world from pollution and energy control. I stopped counting the number of discoveries attributed to GEET in 2003. Back then, there were over 100. I thought it was time to validate all I could for students around the world and people like me who are looking for answers but could not find them in the conventional books available through a library or university. If you have sought the answers to clean air and water with an unlimited supply of energy and could not find them, I am hoping you will find exactly that within the contents of this book. Some of the discoveries occurred over a hundred years ago. Where did the books go that had this knowledge? Did they simply vanish? Were they destroyed? We may never know the truth, but it is not relevant today. What is important is we cannot forget this knowledge. I hope others can expound upon it. If I can pioneer the road to clean, fresh air and clean water by showing you how to reduce emissions from every single piece of equipment on the planet that uses fuel, even if only by 10 percent, this would be a major accomplishment. Some of the things you will learn in this text will show you that 100 percent reduction in pollution is possible, and it has been accomplished.

Paul Pantone - a man ahead of his time

By Wayne K Legg

Very Interesting, full of history of Paul Pantone and his devices. In the future he will be considered a genius. A great read for those who like to experiment with small engines. Highly Recommended.
