TOTAL ABUNDANCE, TOTAL POWER: A LITTLE BOOK OF BIG IDEAS BY DAVID SEAMAN PDF

This book isn't a long treatise — instead, it's a get in, get out, and get GOING approach to greater personal happiness and prosperity... combined with many specific predictions about where the world is headed, using expert data.

Drawing on various philosophical masters, as well as personal experiences with both extreme success (founding a profitable web site used by millions of people) and recent disappointing failure (well, you'll have to find out), this is honestly the best thing I have ever put out into the world with my name on it.

Readers will identify with many of the problems in my life, and will be intrigued by some of the internal solutions I've developed over the past year.

I intend for this to serve as a guest pass into my mind, giving you a sense of how I view world events — and INFECTING you with my unstoppable excitement for the disruptive technologies headed our way.

Early readers (granted, they are biased friends) tell me it's exactly what DS Hour listeners will dig. And more than that, it felt like the right book for 2013, at a time when our economy and many of our values seem to be in flux.

I'm ridiculously excited this is only coming out as a beautifully designed e-book — rather than waiting more than a year for readers to get it, it is available immediately. And the book's producer and I can do things that traditional publishers wouldn't dare.

A Great Read and a Must Have

By RFP

Total Abundance Total Power is a must read for anyone interesting in a focused approach to being your best self. There is way to much noise in the 'self help' space. David cuts the BS and distills down what you need to know now. His no nonsense approach gives readers a short but thorough book that they'll enjoy. I read it in one sitting, and i'll probably read it again on my next flight.

Optimism in shorthand

By TommyP

David Seaman engages the reader in his philosophies on life, in this current day and age of technological abundance. He talks about the traps we can get caught in and explains that we are our own greatest enemy when it comes to getting things done but that we ourselves; have all the power to be who ever we want and shape the world into our own greatest creation. Great and enjoyable quick read.
